

RYO Ampmix

- ① high impedance input (offset normaled to channel, gives upto +5V @knob full cw).
- ② buffered output
- ③ Gain knob (past 50% amplifies up to 2.0x gain (6dB) max)
- ④ high impedance input
- ⑤ Gain knob (past 50% amplifies up to 2.0x gain (6dB) max)
- ⑥ buffered output
- ⑦ high impedance input
- ⑧ Gain knob (past 50% amplifies up to 2.0x gain (6dB) max)
- ⑨ buffered output
- ⑩ high impedance input
- ⑪ Gain knob (past 50% amplifies up to 2.0x gain (6dB) max)
- ⑫ buffered output/mix out

Can be configured as

4 channel mixer,
1 attenuator + 3 channel mixer, 2 attenuators + 2
channel mixer or, 4 attenuators.

Width: 8hp
